

Mission Critical Data & Telcom Projects:

Mission Critical Data Center – Guatire, Venezuela

Enterprise size high density mission critical data center facility with air cooled chillers, Tier certification, secondary chilled water distribution, DDC controls for financial services firm. New facility

Palm Beach Sheriff's Office ISS Room- Palm Beach County, Florida

High density mission critical facility incorporating pumped refrigerant system with Row based cooling, and secondary underfloor air distribution.

Four Points ISS Room- Palm Beach County, Florida

In row chilled water units, Hot aisle containment, air cooled chilled water. Located within existing renovated government building.

Mission Critical Data Center – Valencia, Venezuela

Enterprise size high density mission critical data center facility with air cooled chillers, Tier certification, secondary chilled water distribution, DDC control for technology park. New facility.

Clerk of Courts Judicial Center IT Room- Palm Beach County, Florida

Mission critical space within Judicial Center, air cooled system, underfloor cooling.

South Atlantic Crossing- St. Croix, U.S. Virgin Islands

Enterprise size telecom mission critical facility. Air cooled CRAH units. New facility

IT Data Center- Ceara State, Brazil

Approx. 4000 sq. ft., air cooled CRAH units, underfloor air distribution. New addition to existing facility.

IT Data Center- Ceara State, Brazil

Approx. 2200 sq. ft., air cooled inrow cooling DX units. Upgrade of existing facility.

Modular Containerized Data Center-

Packaged container data center, packaged integrated air cooled chilled water system designed for all climate regions.
